

# Metrohm Illicit and General Chemicals Library

The largest collection of illicit drugs available, combined with polymers, dyes and other common chemicals

## HIGHLIGHTS

- Fast, intuitive detection of fentanyl and other narcotics, hazardous chemicals, and unknown substances
- Material ID for diverse industries
- Common and general materials support ID of real-world mixtures
- Available on Metrohm's handheld and benchtop Raman systems

**Metrohm  
means ...  
Spectroscopy!**

## By Metrohm for Metrohm

Our Raman experts created a comprehensive, current, high-resolution library with the same instruments that you use for analysis. Our DEA license permits us to create narcotics mixtures and measure them directly to provide the best reference data. As new threats emerge, we can respond with updates to our library.

## Unlock the power of your Metrohm system

A large library of relevant materials can support accurate material identification at the point

of contact – no sample prep, no lab, no delays! The new Illicit and General Materials Library contains a wealth of data that will appeal to broad industries. Take a look at Metrohm's Raman solutions!

### THE ILLICIT AND GENERAL CHEMICALS LIBRARY

- fentanyl analogs
- novel psychoactive substances
