

# Accuracy When It Counts

Rapid and Accurate Chemical Identification with TacticID-1064 ST

## HIGHLIGHTS

- Rapid results through advanced optical design and algorithms
- Unparalleled flexibility in substance identification
- Supports timely and informed decisions in critical situations
- Fast deployment and easy handling, even with gloves
- Navigate complex situations with ease and confidence

# Precision in Critical Situations

**Trust in TacticID-1064 ST to deliver precise results when they matter most. In critical moments, you need tools that help you make the right decisions swiftly and accurately, giving you peace of mind and control.**

## Every Second Counts

Leave nothing to chance. Quick identification is critical in emergencies where every second counts, such as chemical spills or suspected hazardous material incidents. Rapid results ensure that users can respond promptly and effectively to any scenario.

## Confidence Under Pressure

TacticID-1064 ST supports both extensive and specialized Raman libraries, providing users with flexibility in identification of unknown hazards. Large libraries encompass a wide range of chemicals for comprehensive identification capabilities in scenarios encountered by first responders, hazmat teams, and border patrol agents. Select smaller, focused libraries for specific applications and get rapid results with minimal data processing time. This dual approach maximizes the efficiency and accuracy of the TacticID-1064 ST, making it an invaluable tool for any situation.

## ORDERING INFORMATION

Packages	
29530020	Advanced Package TacticID-1064 ST Includes all Smart Attachments for diverse applications in any environment
29530010	Basic Package TacticID-1064 ST All the essentials for material identification applications
