

dUnitrode mit Pt1000

6.00200.300

Digitale, kombinierte pH-Elektrode für OMNIS mit integriertem Pt1000-Temperaturfühler. Sie eignet sich besonders für:

- pH-Messungen und Titrationsen in schwierigen, viskosen oder alkalischen Proben
- bei erhöhter Temperatur
- für Langzeitmessungen

Das Festschliffdiaphragma ist gegen Verschmutzung unempfindlich.

Referenzelektrolyt: $c(\text{KCl}) = 3 \text{ mol/L}$, Aufbewahrung in Aufbewahrungslösung.

Alternativ: Referenzelektrolyt für Messungen bei $T > 80^\circ\text{C}$: Idrolyt, Aufbewahrung in Idrolyt.

dTrodes können an OMNIS Titratoren verwendet werden.

6.2325.100

Cleaning solution 3 x 50 mL

Reliable measuring results over long periods of time can be guaranteed only if the pH glass membrane and the diaphragm receive preventive and regular care. Cleaning by etching with toxic chemicals or applying mechanical treatment to the diaphragm is not only complicated and expensive, it also accelerates the ageing of the pH glass electrode.

The cleaning solution was developed for easy and gentle cleaning of pH glass electrodes. Regular use can considerably prolong their service life.

This cleaning solution is also part of the pHit kit.
